Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-11, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Yuan et al (U.S. 5,705,973). Yuan et al discloses a free layer 26 and an AFM layer 32 between a pinned layer 29 and a biasing layer 34 wherein the pinned layer and biasing layer are magnetized anti-parallel to each other as shown by arrows 29a,34a in figure 3. Yuan states that the magnetization of a pinned layer on one side of the free layer will be balanced by the biasing layer on the same side of the free layer, i.e. the magnetizations of layers 29 and 34 will balance out within the free layer. The AFM layer may be an oxide such as NiCoO. The other dependent claim limitations will be inherently met by Yuan.
